

Bak Polyclonal Antibody

CATALOG #:	3031-100
AMOUNT:	100 µg
LOT #:	_____
HOST:	Rabbit
IMMUNOGEN:	Synthetic peptide corresponding to the N-terminus of human Bak

FORMULATION:

100 µg (0.5 mg/ml) peptide affinity purified rabbit anti-Bak polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 50% glycerol, 1% BSA, 0.02% thimerosal.

SPECIES REACTIVITY: human, monkey, hamster, pig

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

DESCRIPTION:

Bak is a homolog of apoptosis inhibitor Bcl-2. Bak is a member of the Bcl-2 family of proteins and contains Bcl-2 homology region (BH-) 1, 2 and 3. Unlike Bcl-2, Bak promotes cell death and counteracts the anti-apoptotic effect of Bcl-2.

SPECIFICITY:

The immunoaffinity purified antibody detects a 30 kDa band, corresponding to the expected molecular weight of Bak on SDS-PAGE immunoblots. The antibody specificity is confirmed by specific peptide inhibition in immunoblotting studies.

APPLICATION AND USAGE:

The antibody can be used for Western blot analysis (1-4 µg/ml) and immunoprecipitation (5-20 µg/ml). However, the optimal conditions should be determined individually.

FOR RESEARCH USE ONLY! Not to be used in human.
