

# Paraffin Tissue Array

*The solution for high throughput antibody validation*

## Features

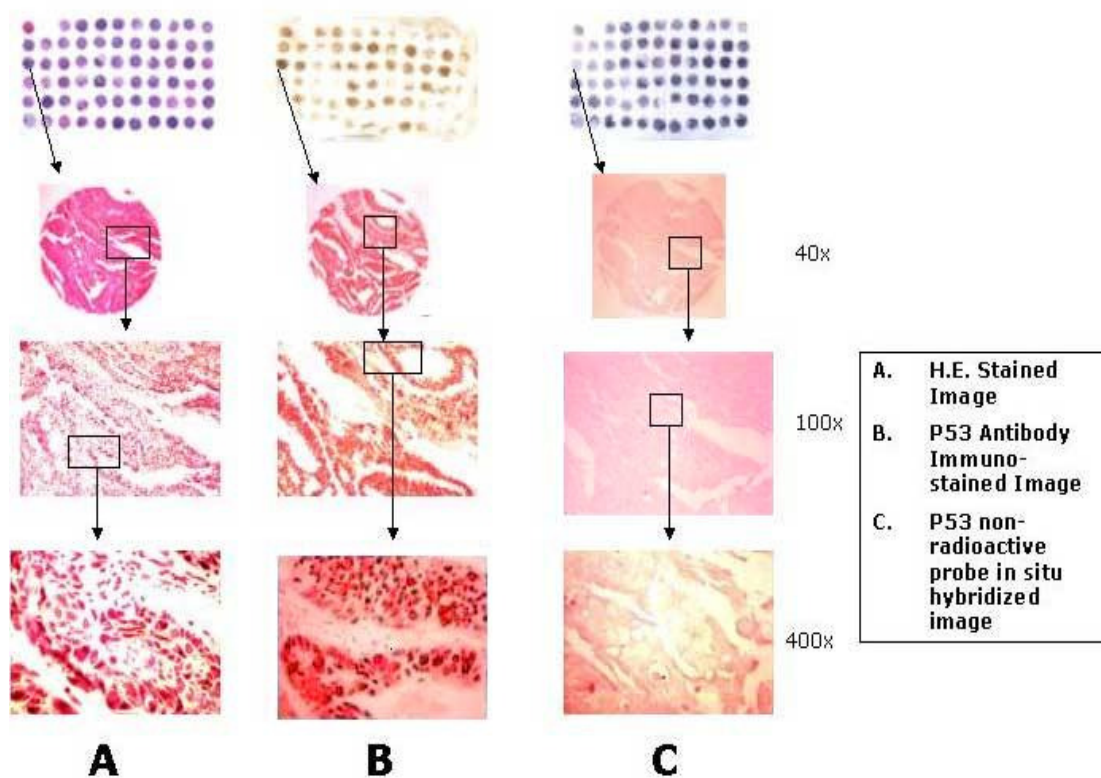

**High definition:** Fresh paraffin tissue sections with well-preserved structure are prepared by our high skill histotechnician with many years experience.

**Broad Coverage:** Provides one of broadest options for various applications: Antibody cross-reactivity screening; various tumors with clinical data and controls; various diseases (e.g. Cardiovascular Disease) with clinical data and controls.

**Service with satisfaction guarantee:** We will even custom-make our tissue arrays fit your need.

**Matched RNA, DNA, cDNA or protein products of each tissue on arrays available for other applications upon request**
